

HASITHA ANJANA

FULL-STACK DEVELOPER INTERN

+94 71 933 6762 | Colombo, Sri Lanka | sdhagnanarathna@gmail.com

GitHub: <https://github.com/Gnanarathna> | **LinkedIn:** <https://linkedin.com/in/gnanarathna>

PROFESSIONAL SUMMARY

Aspiring Full Stack Developer Intern with hands-on experience in developing responsive web applications using React.js, Node.js, Express.js, Flask, and MongoDB. Skilled in REST API development, authentication systems, frontend and backend development, database management, and software testing methodologies. Familiar with AI integrations, cloud APIs, and scalable application development. Strong problem-solving abilities with experience in collaborative team environments.

CORE SKILLS

- Frontend: React.js, Vite, HTML5, CSS3, Tailwind CSS
 - Backend: Node.js, Express.js, Flask, REST APIs
 - Databases: MongoDB, Firebase, Microsoft SQL Server Management Studio (MSSMS)
 - Authentication & Security: JWT Authentication, Google OAuth, Secure API Handling
 - Testing: Unit Testing, Integration Testing, Functional Testing, API Testing (Postman/Thunder Client)
 - Cloud & APIs: OpenAI API, YouTube API, News API, SendGrid API, TMDB API, Face API (face-api.js)
 - Version Control & Deployment: Git, GitHub, CI/CD, Vercel, Render
 - AI / Data Tools: Databricks (Basic), MATLAB (Basic)
 - Other: Responsive Design, Figma, Problem Solving, Team Collaboration
-

EDUCATION & ACTIVITIES

BSc (Hons) Computer Science | NSBM Green University, Sri Lanka
Affiliated with the University of Plymouth, UK

Jan 2023 – Present

Certifications & Activities:

Publicity Team Member – FigMate UI/UX Workshop 2025

Publicity Team Member – Nexora 1.0 Inter University Datathon 2025

Publicity Team Member – DataDive 2025 Power BI Workshop & Competition

Sergeant at Arms – Interact Club, Maliyadeva Adarsha Maha Vidyalaya, Kurunegala

PROJECT EXPERIENCE

PerSoMedia News – Personalized Social Media News Platform

Feb 2026 – May 2026

Technologies: React.js, Flask, MongoDB, Tailwind CSS, JWT, OpenAI API, News API, SendGrid

- Developed a full-stack personalized news platform with AI-powered fake news detection.
- Built responsive frontend interfaces using React.js, Vite, and Tailwind CSS.
- Developed RESTful APIs and backend services using Flask and MongoDB.
- Implemented JWT authentication, Google OAuth, and secure session management.
- Integrated OpenAI API for fake news analysis and confidence-based detection.
- Added personalized features including favorites, watch later, notifications, and analytics dashboard.
- Implemented API testing and backend test suites for authentication and system reliability.

FurneX – Interactive Room Layout and Furniture Design System (Group Project) Mar 2026 – April 2026

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Three.js, React Three Fiber, JWT

- Collaborated in a full-stack team project following CI/CD workflows and Git branching strategies.
- Developed public homepage and authentication-related features.
- Implemented forgot password, reset password, and remember-me functionalities.
- Worked with microservices architecture and API Gateway integration.
- Built responsive frontend interfaces using React.js and Tailwind CSS.
- Integrated MongoDB and REST APIs for user and project management.

GitHub: <https://github.com/nykendelpitiya/FurneX>

NovaFlow – Full-Stack Project Management System (Group Project)

Nov 2025 – Jan 2026

Technologies: React.js, Node.js, Express.js, MongoDB, JWT, WebSockets, Docker, GitHub Actions

- Collaborated in a full-stack team project following GitHub classroom management.
- Developed the Project Manager Dashboard and project management module.
- Implemented project creation, update, deletion, and project tracking functionalities.
- Built REST APIs and integrated frontend-backend services using MongoDB.
- Contributed to role-based authentication, analytics dashboard, and Kanban workflow features.
- Worked with Docker-based deployment setup and GitHub Actions CI pipeline.

MoodFlix – Mood-Based Movie Recommendation Web App (Group Project)

Nov 2024 – Apr 2025

Technologies: React.js, Tailwind CSS, Redux Toolkit, face-api.js, TMDB API, YouTube API

- Contributed to the development of an AI-powered movie recommendation web application.
- Developed the Q&A-based mood analysis and movie recommendation module.
- Implemented mood-to-genre mapping logic for personalized movie suggestions.
- Integrated TMDB API for fetching movie data and recommendations.
- Built responsive frontend interfaces using React.js and Tailwind CSS.
- Collaborated in frontend feature integration and recommendation workflow development.

VendPay - IoT Based Smart Vending Machine with QR Payment (Group Project)

Oct 2024 – Mar 2025

Technologies: ESP32, IoT, Firebase, HTML, CSS, JavaScript, QR Code Payment

- Collaborated in developing an IoT-enabled smart vending machine with QR-based payment.
- Developed the mobile-responsive web application for cashless payment interactions.
- Integrated ESP32 with the web application for automated item dispensing.
- Implemented QR code-based payment access and real-time product interaction features.
- Contributed to frontend development using HTML, CSS, and JavaScript.
- Worked with Firebase for real-time data handling and system connectivity.
